## GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: Computed by dividing the aggregate days of attendance by the average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

BIRTH RATE: Number of births per 1,000 population (excluding armed forces abroad).

COLLEGE STUDENTS: Students taking work creditable toward a bachelor's or higher degree.

CRIMES, MAJOR: Murder, non-negligent manslaughter, forcible rape, robbery, aggrevated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific non-property taxes.

ECONOMIC OPPORTUNITY AND MANPOWER: State administrative expenses (formerly employment security administration), 1963 to date; manpower development activities and related programs, 1963 to date; work experience and training, community action, and Neighborhood Youth Corps, 1965 to date; adult training and development, 1967-70; work incentive activities, 1969 to date; concentrated employment, public service careers, equal employment opportunity, and Operation Mainstream, 1971 to date; public employment, 1972; and minority business development, 1973.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

ENROLLMENT PARTICIPATING IN SCHOOL LUNCH PROGRAM: Represents average number of children participating in December. The number of children may have been higher in some states during other months, but December was the peak month in terms of the national participation of children.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire fighting and fire protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INDEMNITY PLAN: A subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the federal government for local purchases of food on a basis of quality and quantity of meals served.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in colleges and universities, including those in hospitals, agricultural experiment stations and farms.

LAND: Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lake reservoirs, ponds under 40 acres of area.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NET MIGRATION RATE: The difference between in-migration and out-migration as a percent of the population of April 1, 1970. A minus sign indicates a net loss.

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC ASSISTANCE: All federal-state assistance programs of income maintenance, medical and social services, demonstration projects, and administration; reported by aid category through 1968 and thereafter in various summary forms: old-age assistance, aid to families with dependent children, and aid to the blind, 1936 to date; medical assistance for the aged, 1961-70; aid to the aged, blind, or disabled, 1964 to date; and medical assistance, 1966 to date.

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: Includes persons in the armed forces stationed in each area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

# FOREWORD

The 1978 edition of Rankings of the States includes modifications that will be obvious to users of previous editions. The section that consisted of outlying areas and the District of Columbia has been eliminated, and the District of Columbia is now ranked with the fifty states.

Also, for the first time, higher education faculty salaries and data on handicapped children have been added.

Although the figures used in these tables of rankings are the latest available, some are estimates prepared in advance of detailed reports and, as such, are subject to revision. Some are based on sampling studies, for which measures of sampling variability are not recorded here. Please exercise caution when making conclusions based on slight differences among states in rankings of a specific item and when using the data or rankings in trend research since the series is usually not revised when final figures become available.

Until 1976, Rankings of the States recommended reducing dollar amounts in Alaska by 25 percent and in Hawaii by 19 percent. That practice has been discontinued. It might be useful to make percentage adjustments for all states, but there are no data that give the cost-of-living variation between the states.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are listed alphabetically and given the same rank; the appropriate number is then picked with the next state in rank.

Tables D-15, D-16, and D-17 consist of data from the Sales and Marketing Management Survey of Buying Power, a copyrighted work. Anyone wishing to reproduce these tables must get permission directly from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This research project was headed by Richard J. Nuanes. A special acknowledgement should also go to Arthuryne J. Taylor for her critical review and to Cheryl J. Lucas for her able and timely assistance.

Frank W. Kovacs
NEA Research Director

| 24. | Indiana | 61.7 |
| 25. | Montana | 61.0 |
| 26. | Massachusetts | 60.7 |
| 27. | Texas | 60.0 |
| 28. | Delaware | 59.0 |
| 29. | Vermont | 58.9 |
| 30. | Kansas | 58.4 |
| | Wyoming | 58.4 |
| 32. | Idaho | 57.9 |
| | UNITED STATES | 57.3 |
| 33. | Colorado | 57.1 |
| 34. | Oregon | 56.4 |
| 35. | District of Columbia | 55.0 |
| 36. | Arizona | 54.0 |
| 37. | Wisconsin | 52.3 |
| 38. | Illinois | 51.7 |
| 39. | Ohio | 48.3 |
| | New Hampshire | 48.3 |
| 41. | Washington | 47.9 |
| 42. | Rhode Island | 46.9 |
| 43. | Michigan | 46.2 |
| 44. | Connecticut | 46.1 |
| 45. | Pennsylvania | 46.0 |
| 46. | Nevada | 44.7 |
| 47. | New York | 44.4 |
| 48. | Alaska | 43.8 |
| 49. | Maryland | 43.6 |
| 50. | California | 41.7 |
| 51. | New Jersey | 41.5 |

Census, *Statistical Abstract, 1977*, p. 121.

## B-11—PERCENT CHANGE IN NUMBER OF PUBLIC HIGH SCHOOL GRADUATES, 1971-72 TO 1976-77

| | | |
|---|---|---|
| 1. | Nevada | 29.1 |
| 2. | Massachusetts | 28.1 |
| 3. | New Hampshire | 21.9 |
| 4. | Alaska | 20.4 |
| 5. | Montana | 14.7 |
| 6. | Vermont | 14.0 |
| 7. | Nebraska | 13.9 |
| 8. | Arizona | 13.7 |
| 9. | Florida | 12.2 |
| 10. | West Virginia | 11.6 |
| 11. | Delaware | 11.1 |
| 12. | New Jersey | 10.8 |
| 13. | Maryland | 10.2 |
| 14. | Colorado | 9.5 |
| | Mississippi | 9.5 |
| 16. | District of Columbia | 8.7 |
| 17. | Indiana | 8.5 |
| 18. | Virginia | 8.0 |
| 19. | Minnesota | 7.9 |
| 20. | Connecticut | 7.4 |
| 21. | Georgia | 7.1 |
| 22. | New York | 7.0 |
| 23. | Arkansas | 6.7 |
| | New Mexico | 6.7 |
| 25. | Texas | 6.5 |
| | UNITED STATES | 6.0 |
| 26. | California | 5.9 |
| | Maine | 5.9 |
| 28. | Louisiana | 5.8 |
| 29. | Rhode Island | 5.2 |
| 30. | Mississippi | 4.7 |
| 31. | Ohio | 4.5 |
| 32. | Alabama | 4.4 |
| | Utah | 4.4 |
| 34. | Illinois | 4.1 |
| | Michigan | 4.1 |
| 36. | Hawaii | 4.0 |
| 37. | Pennsylvania | 2.4 |
| 38. | South Carolina | 1.9 |
| 39. | Kentucky | 1.7 |
| | North Dakota | 1.7 |
| 41. | Idaho | 1.6 |
| 42. | North Carolina | 1.1 |
| 43. | Wisconsin | 0.8 |
| 44. | Oklahoma | 0.4 |
| | Wyoming | 0.4 |
| 46. | Washington | −1.3 |
| 47. | Iowa | −1.6 |
| 48. | Kansas | −2.8 |
| 49. | Tennessee | −4.5 |
| 50. | Oregon | −5.1 |
| 51. | South Dakota | −5.4 |

NEA, *Estimates of School Statistics, 1977-78*, p. 24; and USOE, *Digest of Education Statistics, 1973*, p. 56.

## B-12—TOTAL ENROLLMENT IN STITUTIONS OF HIGHER EDU TION, FALL 1975

| | | |
|---|---|---|
| 1. | California | 1,787 |
| 2. | New York | 1,005 |
| 3. | Texas | 624 |
| 4. | Illinois | 584 |
| 5. | Michigan | 496. |
| 6. | Pennsylvania | 470. |
| 7. | Ohio | 436. |
| 8. | Massachusetts | 384. |
| 9. | Florida | 344. |
| 10. | New Jersey | 297. |

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: Computed by dividing the aggregate days of attendance by the average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

BIRTH RATE: Number of births per 1,000 population (excluding armed forces abroad).

COLLEGE STUDENTS: Students taking work creditable toward a bachelor's or higher degree.

CRIMES, MAJOR: Murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

ECONOMIC OPPORTUNITY AND MANPOWER: State administrative expenses (formerly employment security administration), 1963 to date; manpower development activities and related programs, 1963 to date; work experience and training, community action, and Neighborhood Youth Corps, 1965 to date; adult training and development, 1967-70; work incentive activities, 1969 to date; concentrated employment, public service careers, equal employment opportunity, and Operation Mainstream, 1971 to date; public employment, 1972; and minority business development, 1973.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

ENROLLMENT PARTICIPATING IN SCHOOL LUNCH PROGRAM: Represents average number of children participating in December. The number of children may have been higher in some states during other months, but December was the peak month in terms of the national participation of children.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire fighting and fire protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INDEMNITY PLAN: A subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the federal government for local purchases of food on a basis of quality and quantity of meals served.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in colleges and universities, including those in hospitals, agricultural experiment stations and farms.

LAND: Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lake reservoirs, ponds under 40 acres of area.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NET MIGRATION RATE: The difference between in-migration and out-migration as a percent of the population of April 1, 1970. A minus sign indicates a net loss.

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC ASSISTANCE: All federal-state assistance programs of income maintenance, medical and social services, demonstration projects, and administration; reported by aid category through 1968 and thereafter in various summary forms: old-age assistance, aid to families with dependent children, and aid to the blind, 1936 to date; medical assistance for the aged, 1961-70; aid to the aged, blind, or disabled, 1964 to date; and medical assistance, 1966 to date.

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: Includes persons in the armed forces stationed in each area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

# INDEX TO TABLES

*Numbers refer to tables.*

Administrative units:
  number of, B-1
Average daily attendance:
  expenditures per pupil, H-1, H-10
  expenditures per pupil, increase in, H-13
  expenditures per pupil as percent of national average, H-9, H-11
  expenditures per pupil as percent of personal income, H-12
  number, B-5
  percent of fall enrollment, B-8
  percent of average daily membership, B-7
  personal income per pupil, D-12

# FOREWORD

This edition of *Rankings of the States* is the 22nd in a series. For the first time, the tables in *Rankings* have been calculated and ranked entirely by computer. This method has saved an enormous amount of production time, reduced the possibility of error, and enhanced the computer data base.

Some limitations to the data were encountered during work on this edition. Since most of the information originates from federal sources and since federal data are not always issued yearly, NEA was unable to update 16 of the 129 tables. Nonetheless, these 16 unchanged tables have been included because they still provide the most current figures. *Users are cautioned, however, to note carefully the dates on the table headings to determine the designated year for which the rankings are pertinent.*

Although the figures used in the tables of rankings are the latest available, some are estimates prepared in advance of detailed reports and, as such, are subject to revision. Some are based on sampling studies, for which measures of sampling variability were not recorded. Caution should be exercised when making conclusions based on slight differences among states in rankings. Appropriate assumptions are needed for trend research comparisons since the series is not revised to accommodate changes in estimates when final figures become available.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are listed alphabetically and given the same rank; the appropriate number is then picked with the next state in rank.

Tables D-15, D-16, and D-17 consist of data from the *Sales and Marketing Management Survey of Buying Power*, a copyrighted work. Anyone wishing to reproduce these tables must get permission directly from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This research project was headed by Richard Nuanes. A special acknowledgement should go to Richard Scott for his direction of the computer operations for this project.

# RANKINGS OF THE STATES, 1979

## Errata

The Iowa Department of Public Instruction has reported a significant change in its expenditure data for 1977-78 and 1978-79. This has also resulted in a slight change in the figures for the United States. Therefore, included here are Tables H-9 through H-16, which have been re-ranked to reflect the changes reported by Iowa.

–Richard J. Nuanes
*Project Director*

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC ASSISTANCE: All federal-state assistance programs of income maintenance, medical and social services, demonstration projects, and administration; reported by aid category through 1968 and thereafter in various summary forms: old-age assistance, aid to families with dependent children, and aid to the blind, 1936 to date; medical assistance for the aged, 1961-70; aid to the aged, blind, or disabled, 1964 to date; and medical assistance, 1966 to date.

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of the area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

# INDEX TO TABLES

# FOREWORD

This edition of *Rankings of the States* is the 23rd in a series. For the first time, the tables in *Rankings* have been calculated, ranked, and printed entirely by computer. This method has saved an enormous amount of production time, reduced the possibility of error, and enhanced the computer data base.

Since most of the information originates from federal sources and since federal data are not always issued yearly, NEA was unable to update every table. Nonetheless, these unchanged tables have been included because they still provide the most current figures. *Users are cautioned, however, to note carefully the dates on the table headings to determine the designated year for which the rankings are pertinent.*

Although the figures used in the tables of rankings are the latest available, some are estimates prepared in advance of detailed reports and, as such, are subject to revision. Some are based on sampling studies, for which measures of sampling variability were not recorded. Caution should be exercised when making conclusions based on slight differences among states in rankings. Appropriate assumptions are needed for trend research comparisons since the series is not revised to accommodate changes in estimates when final figures become available.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are listed alphabetically and given the same rank; the appropriate number is then picked with the next state in rank.

Table D-15 consists of data from the *Sales and Marketing Management Survey of Buying Power*, a copyrighted work. Anyone wishing to reproduce this table must get permission directly from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This research project was headed by Alton Sheridan. A special acknowledgment should go to Susan Falsey for her direction of the computer operations for this project.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: The aggregate days of attendance divided by the aggregate average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; or initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific non-property taxes.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

ENROLLMENT PARTICIPATING IN SCHOOL LUNCH PROGRAM: Percent is calculated using average number of children participating in December. The number of children may have been higher in some states during other months, but December was the peak month in terms of the national participation of children.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire fighting and fire protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor

store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INDEMNITY PLAN: A subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the federal government for local purchases of food on a basis of quality and quantity of meals served.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt (see Debt).

LAND: Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lake reservoirs, ponds under 40 acres of area.

LIVE BIRTHS: Number of births in the U.S. (including armed forces overseas).

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NET MIGRATION RATE: The difference between in-migration and out-migration as a percent of the population of April 1, 1970. A minus sign indicates a net loss.

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not

directly related to rates applying for general property taxation).

PUBLIC ASSISTANCE: All federal-state assistance programs of income maintenance, medical and social services, demonstration projects, and administration; reported by aid category through 1968 and thereafter in various summary forms: old-age assistance, aid to families with dependent children, and aid to the blind, 1936 to date; medical assistance for the aged, 1961-70; aid to the aged, blind, or disabled, 1964 to date; and medical assistance, 1966 to date.

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of the area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

## FOREWORD

*Rankings of the States, 1981* is the 24th in a series. For the second year, the tables have been calculated, ranked, and printed by computer, thereby reducing the possibility of error, and enhancing the computer data base.

Since most of the information originates from federal sources and since federal data are not always issued yearly, it was not feasible for NEA Research to update every table. Nonetheless, the unchanged tables have been included because they continue to provide the most current figures. Users are cautioned, however, to note carefully the dates on the table headings to determine the designated year for which the rankings are pertinent.

The figures used in the tables of rankings are the latest available. Some of these figures are estimates prepared in advance of detailed reports and, as such, are subject to revision; some are based on sampling studies, for which measures of sampling variability were not recorded. Therefore, caution should be exercised when formulating conclusions based upon slight differences among states in rankings. Furthermore, since the series is not revised to accommodate changes in estimates when final figures become available, appropriate assumptions are advised for trend research comparisons.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are listed alphabetically and given the same rank; the appropriate number is then picked with the next state in rank.

Tables D-15 and D-16 consist of data from the Sales and Marketing Management Survey of Buying Power, a copyrighted work. Anyone wishing to reproduce these tables must obtain permission directly from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This research project was directed by Susan Carmon. Special acknowledgement is made to Steven R. Frieman for his management of the project's computer operations, and to Susan M. Falsey and Suzanne H. Gardner for their able and timely assistance. In addition, an expression of gratitude is extended to Statistical Assistants Ruth Jones, Daisy Lane, Cheryl Lucas, and Frieda Morgan.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: The aggregate days of attendance divided by the aggregate average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; or initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

ENROLLMENT PARTICIPATING IN SCHOOL LUNCH PROGRAM: Percent is calculated using average number of children participating in December. The number of children may have been higher in some states during other months, but December was the peak month in terms of the national participation of children.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire-fighting and fire-protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor

store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INDEMNITY PLAN: A subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs. Sponsors of school-lunch programs are reimbursed by the federal government for local purchases of food on a basis of quality and quantity of meals served.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt. (see Debt)

LAND: Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lake reservoirs, ponds under 40 acres of area.

LIVE BIRTHS: Number of births in the U.S.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NET MIGRATION RATE: The difference between in-migration and out-migration as a percent of the population of April 1, 1970. A minus sign indicates a net loss.

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not

directly related to rates applying for general property taxation).

PUBLIC ASSISTANCE: All federal-state assistance programs of income maintenance, medical and social services, demonstration projects, and administration; reported by aid category through 1968 and thereafter in various summary forms: old-age assistance, aid to families with dependent children, and aid to the blind, 1936 to date; medical assistance for the aged, 1961-70; aid to the aged, blind, or disabled, 1964 to date; and medical assistance, 1966 to date.

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of the area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution to local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

## EXECUTIVE SUMMARY

*Rankings of the States, 1982*

*Rankings of the States* is an annual publication of NEA Research. This 25th edition presents data pertaining to education in several series. These are: population, enrollment and attendance, faculty, general financial resources, governmental revenue, school revenue, governmental expenditures and debt, and school expenditures.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are given the same rank. The appropriate number is then picked up with the next state in rank.

Data in this research memo provide basic information necessary for association research activities. Suggested uses of the data include the following:

- The sections on population, enrollment, and staffing can be used as a barometer to measure past and future enrollments, and to assess progress in reducing pupil/teacher ratios. (Tables A-10, B-2, C-5, and C-7).
- For legislative purposes, the revenue sections might be used to inform legislators of your state's efforts to support public schools as measured by the percent of personal income going to education, and state aid as a percent of school revenues. (Tables F-3, F-4, F-7 and F-8).
- The expenditure data are useful for making comparisons with neighboring states. This would include such items as expenditure per ADM, per capita expenditures for schools, or per capita expenditures for higher education. (Tables H-6, H-7, H-15).

Most of the data in this report comes from federal sources and the NEA data bank, the exceptions being the tables showing effective buying income and retail sales. These data are from Sales and Marketing Management's *Survey of Buying Power*. They are protected by copyright and may not be reproduced without permission.

# FOREWORD

*Rankings of the States, 1982*, the 25th in a series, presents statistical data for the 50 states and the District of Columbia on such subjects as public school revenues and expenditures, enrollment, faculty, and general governmental finance. The tables are arranged by topic, and have been calculated, ranked, and printed entirely by computer.

A large portion of the information contained in this report originated from federal government sources. Due to delays in federal data reporting, NEA Research was unable to include or update several tables dealing with population and education statistics. Also, some of the data are preliminary and are therefore subject to revision.

For the first time, this edition of *Rankings of the States* features revised figures for 1981-82 *Estimates of School Statistics*. State departments of education were invited to review their fall 1981 projections as originally submitted to NEA Research, in order to provide the best possible estimates of public elementary and secondary school data. For this reason, tables containing these estimates may differ from earlier published reports.

The states are ranked beginning with the largest figure. When figures for two or more states are identical, the states are assigned the same rank, with the next state in rank appropriately numbered.

Tables D-15 and D-16 consist of data from the Sales and Marketing Management Survey of Buying Power, a copyrighted work. Anyone wishing to reproduce these tables must obtain permission directly from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This research project was directed by Susan Carmon Gewirtz and Peter Veillette. Special appreciation is extended to Susan M. Falsey for her technical support in the project's computer operations.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: The aggregate days of attendance divided by the aggregate average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings: additions to buildings; remodeling of buildings; or initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire-fighting and fire-protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt. (see Debt)

LAND: Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lake reservoirs, ponds under 40 acres of area.

LIVE BIRTHS: Number of births in the U.S.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of the area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and intermediate

districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution of local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad.)

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

## FOREWORD

For twenty-six years, *Rankings of the States* has provided legislators, school officials, Association planners and others with rank-ordered data pertaining to education. This edition, *Rankings of the States, 1983*, continues to provide basic information on population, enrollment and attendance, government and school revenues and expenditures, and faculty.

The state data are ranked beginning with the largest figure. When the values of two or more states are identical, the states are assigned the same rank, with the appropriate numbering resumed with the next state in rank. It is important to note that rank-ordered statistics for states and other government jurisdictions necessarily imply commonalities in government operation, spending priorities, or social-environmental conditions which actually may not be the case. The fifty states and the District of Columbia are in truth unique entities with only the broadest characteristics in common. Care should be taken, therefore, to avoid drawing conclusions or making decisions based solely on these comparative data.

*Rankings of the States, 1983* features revised figures for data contained in *Estimates of School Statistics, 1982-83*, another annual report of NEA Research. State education agencies were invited to review their fall 1982 projections originally submitted to NEA Research in order to obtain the most current estimates of public elementary and secondary school data. For this reason, tables in B, C, F, and H Series containing these estimates may differ from those in the *Estimates* report. Footnotes regarding the estimated data appear at the end of those series.

A large portion of the information contained in *Rankings of the States* originated from federal government sources. Changes in the availability and timeliness of those sources affects their use in this report.

Tables D-15 and D-16 contain data from the Sales and Marketing Management *Survey of Buying Power*, a copyrighted work. Anyone wishing to reproduce these tables must obtain permission from Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

This project was directed by Susan Carmon Gewirtz with the assistance of other NEA Research staff members. Special thanks go to Susan M. Falsey for her direction of the project's computer operations.

## POPULATION

The population tables in Series A are useful in assessing and predicting the demand for public education, based on changes in shifts in the total and school-age population.

Tables A-1 through A-3 rank the total resident population in the United States, allowing comparisons among states and compraisons over time. These figures, along with tables A-10 and A-11, describe the state of population growth or decline in a state, particularly when used in conjunction with prior editions of *Rankings of the States*.

Tables A-4 and A-5 focus directly on the current consumers of public elementary and secondary education—the 5 to 17 age group, or school-age population. Changes in the size of this age group affect demand and support for public education in a state. For this reason, it is helpful to use tables A-4 and A-5 with tables in the B Series that deal with public school enrollment.

Information about the adult population is featured in table A-9, with tables A-7 showing the relationship of the adult population to the school-age population, and tables A-8 and A-9 focusing on the percent of persons over 65 years of age. These tables help to identify the relative demand for public school services in the states, and the degree to which funding for public schools will face competition from other public sector activities.

Table A-12 ranks the "Population per Square Mile of Land Area, 1980." These data indicate the relative density of population in the states, as well as the average population density for the U.S.

## ENROLLMENT, ATTENDANCE, AND MEMBERSHIP

Enrollment, attendance, and membership in the public schools, along with enrollment figures for higher education institutions, present a picture of the participation of youths in the public education systems and in colleges and universities. Tables B-2, B-3, and B-4 contain enrollment data, showing the range in the demand for public school services based on the number of students counted in the fall of the school year. For example, table B-4 ranks the states according to the percent of students enrolled in public versus private schools.

Tables B-5 through B-8 rank the states according to two alternative measures of public school participation—Average Daily Attendance (ADA) and Average Daily Membership (ADM). These measures reflect the year-round demand for educational services, and are defined in the glossary of this report.

Table B-10 ranks the percent change in the number of high school graduates from 1977-78 to 1982-83. The overall drop in the secondary school population over the last five years as shown in the table, implies a reduced demand for higher education in the years to come. Enrollment statistics for institutions of higher education are featured in tables B-11, B-12, and B-13, showing total enrollment, the change in enrollment, and the percentage of women enrolled. The demand for higher education in the states and the changes in the composition of higher education enrollment are compared in these tables.

Following the tables in B Series, a footnote page identifies estimated data within the series developed by NEA Research, and estimates provided by state education departments.

## NOTES TO B SERIES TABLES

NEA Research estimates for selected variables within the B Series are identified below by state and by table number. NEA estimates appear in those cases where the state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | B-3, B-5, B-7 |
| Arizona | B-1 through B-3, B-5 through B-8, B-10 |
| California | B-6, B-7 |
| District of Columbia | B-1 through B-3, B-5 through B-8, B-10 |
| Michigan | B-3, B-10 |
| North Carolina | B-1 through B-3, B-5 through B-8, B-10 |
| North Dakota | B-1 through B-3, B-5 through B-8, B-10 |

## FACULTY

The tables in C Section deal with the personnel in local schools and in higher education institutions. Changes in the number and salaries of persons employed in elementary, secondary, and higher education are linked to population and enrollment trends, as well as changes in the financial condition of governments and school systems. Thus, it is useful to examine C Series tables along with tables in other series to understand the level of education employment in the states.

Tables C-1 through C-3 rank the states according to the number of staff employed in local public schools in 1981. Comparable data for public colleges and universities appear in tables C-4 through C-6.

Data from B Series tables are utilized in tables C-7 through C-9 to provide three measures of the pupil-teacher ratio, those based on enrollment, attendance, and membership statistics.

Teacher salary data for the last two school years are featured in tables C-11 through C-16, with table C-15 comparing the percent increases in average classroom teacher salaries over the period 1972-73 to 1982-83. Instructional staff salaries, which include those of teachers, are similarly compared in tables C-17 through C-22.

Compensation levels of higher education faculty appear in the final tables of C Series. Three categories of public higher education institutions are presented: public universities, other public four-year colleges, and public two-year colleges. Further definitions of instructional staff and other personnel designations appear in the glossary of this report.

Footnotes to C Series tables appear at the end of the section. These notes differentiate between estimated data developed by NEA Research and estimates provided by the state departments of education.

| North Dakota | C-7 thruogh C-22 |
| Vermont | C-11 through C-22 |

## GENERAL FINANCIAL RESOURCES

Personal income is a widely used measure of the overall economic activity of states. It is defined as the aggregate or total income from *all* sources received by persons residing in a state, and has a significant effect on the total income or financial resources available to governmental jurisdictions through their revenue collection mechanisms. It measures the pool of funds available to governmental units in a state to finance public education and other public services.

Tables D-1 and D-2 compare states on their total personal incomes as well as percent increases over time. Per capita personal income tables are featured in tables D-3 through D-6. They portray state personal income per resident—a more meaningful comparison of the relative income among states.

Tables D-7 through D-10 present another measure of state income—disposable personal income. Disposable personal income is personal income minus taxes and "other nontax payments," such as fines, penalties, fees paid to hospitals and schools operated mainly by government. Disposable personal income thus reflects the amount of income left for various expenditues *after* taxes and other public service charge. Of particular interest are tables D-8, D-9, and D-10 that show states' positions with regard to per capita disposable personal income.

Tables D-11 and D-12 compare the states on a measure of personal income geared more closely to the "consumers" of public school services. D-13 shows the extent of government input into a state's personal income by measuring personal income from government enterprises as a percent of all personal income, and table D-14 compares states according to their incomes from farming activities. D-15 and D-16 rank the states according to their average household buying incomes and their retail sales.

D-1. TOTAL PERSONAL INCOME, 1981 (IN MILLIONS)

## GOVERNMENTAL REVENUE

The tables featured in E Series concern the revenue collections of state and local governments. Tables E-1 through E-12 provide a variety of measures to indicate the taxing effort and general revenue condition of these jurisdictions. The importance of these measures lies in the fact that approximately 92 percent of public education funds are provided by state and local governments.

E Series tables display revenue data in three major classifications: general revenues, tax collections, and property tax collections. These data are shown by state, with state-local figures combined and sometimes separated so local data are distinct. Some tables are expressed in per capita terms, or as a percent of personal income so as to make meaningful state-to-state comparisons. E Series tables are especially well-suited for use with school revenue tables in F Series and with government expenditure figures in Series G.

## SCHOOL REVENUE

The tables featured in F Series update public school revenue estimates provided NEA Research by state education agencies. The data appear first in *Estimates of School Statistics*, an annual publication of NEA Research, done each Fall. The state departments of education are asked to revise these data in March for inclusion in *Rankings of the States*.

The tables in the F Series examine the states' relative positions with regard to revenues per pupil in Average daily Attendance (ADA), and as a percent of personal income in the state. These measures facilitate comparisons of the financial support for public schools in a state. Tables F-3 and F-4, in particular, show the "effort" of governments to provide financial support for elementary and secondary education.

Tables F-5 through F-10 identify the percent of total revenues provided to local schools by government sources: federal, state, and local. F-11 identifies the local portion of school revenue receipts from state and local sources.

Immediately following the tables in F Series is a listing of occasions where NEA estimates data appear in lieu of state department of education figures.

## NOTES TO F SERIES TABLES

NEA Research estimates for selected variables within the F Series are identified below by state and by table number. NEA estimates appear in those cases where the state education departments did not respond to requests by NEA Research for estimates of school statistics.

| Nebraska | F-2, F-6, F-8, F-10, F-11 |
| Nevada | F-1 through F-11 |
| North Carolina | F-1 through F-11 |
| North Dakota | F-1 through F-11 |

## GOVERNMENT EXPENDITURES AND DEBT

State and local government expenditures provide a profile of governmental activity. Per capita expenditures enable comparisons of a state's level of spending with the U.S. average and neighboring states.

Expenditure levels differ from state to state because of population composition and density, geography, cost of living, scope of government services, legislatively perceived priorities, and many other circumstances. Comparisons among states should take such factors into account.

The ten tables in Series G describe three separate areas of governmental finance: state government expenditures, combined state and local expenditures, and state and local debt.

Table G-1 "Per Capita Total General Expenditures of State Government for all Functions, 1980" suggests the scope of the states' financial role. When compared with the combined state and local outlays shown in table G-2 the relative state and local positions of fiscal responsibility may be determined.

Tables G-3 through G-9 break out total expenditures for each of several selected government functions. They are subsets of the basic data in table G-2.

## SCHOOL EXPENDITURES

Series H consists of 19 tables about comparative expenditures on education for state governments alone, local governments alone, and for state and local governments combined.

Table H-1 presents per capita expenditures for education by state governments. The states that support elementary and secondary education largely with state-collected taxes appear at the top of the list. The states that rely on local government to impose property and other local taxes for the support of schools appear at the bottom of the list. Table H-2 presents a picture of combined state and local expenditures which results in shifting the rankings of most states.

Series H tables present education expenditures in relation to several common denominators such as per capita, percentage of personal income, per pupil in ADA or ADM, or the national average.

Series H tables further distinguish between all education expenditures, those for higher education, and public elementary and secondary education as well for current operations, transportation, administration, and capital outlay.

Taken together, series H tables reveal a great deal about each state's success or failure to gain financial support for education relative to other states. The rankings can have added meaning where a user is able to draw on personal knowledge about the way education is organized and supported in each of several states.

Estimated data obtained from state departments of education appear throughout H Series tables. Instances where NEA Research estimates are used in lieu of state department figures are noted immediately following the series.

## NOTES TO H SERIES TABLES

NEA Research estimates for selected variables within the H Series are identified below by state and by table number. NEA estimates appear in those cases where the state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | H-10 through H-16 |
| Arizona | H-8 through H-16 |
| California | H-14 through H-16 |
| Delaware | H-10, H-11, H-13, H-15, H-16 |
| District of Columbia | H-8 through H-16 |
| Maine | H-8 through H-16 |
| Michigan | H-8 through H-16 |
| Montana | H-8 through H-14 |
| Nebraska | H-10, H-11, H-13, H-15, H-16 |
| Nevada | H-8 through H-16 |
| North Carolina | H-8 through H-16 |
| North Dakota | H-8 through H-16 |

Note: Revenue and expenditure figures for Alabama *do not* contain state contributions to Social Security, teacher retirement systems, or unemployment compensation. The Alabama State Department of Education estimates that had state payments been included, the current expenditure per pupil in Average Daily Attendance (ADA) for 1982-83 would be $2,000.

## OTHER RELEVANT DATA

I Series is a collection of tables containing additional comparative characteristics on government employment and on measures often used to describe the "quality of life" in a particular geographic area.

The government employment measures featured in tables I-1 through I-3 are expressed as percentages of the population or other employment categories and can be used in conjunction with employment tables featured in Series C.

Table I-4 and I-5 measure the relative presence of absence of doctors and dentists in the states, with I-6 and I-7 comparing states on crime rates. These data, along with many other similar measures, are frequently used in assessments of a state's quality of life.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

AVERAGE LENGTH OF SCHOOL TERM: The aggregate days of attendance divided by the aggregate average number of days schools were in session and pupils were in attendance during the year; some states reported the state-mandated minimum number of days rather than the computed average number of days the schools were open.

BASIC ADMINISTRATIVE UNIT: The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; or initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and basic local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education: employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds expended to cover deficit (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

EDUCATION: Provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditure includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October; junior colleges are omitted.

FIRE PROTECTION: Comprises fire-fighting and fire-protection activities of local governments. Federal and state expenditures for forest fire fighting and prevention are classified under "natural resources."

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditure for each function includes amounts for all types of expenditure serving the purpose concerned.

GENERAL EXPENDITURE: All expenditure of a government other than utility expenditure, liquor store expenditure, and insurance trust expenditure.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or international) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agencies) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classed under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditure for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt. (see Debt)

LIVE BIRTHS: Number of births in the U.S.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all intangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC WELFARE: Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditure for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of the area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditure by local and itnermediate

districts: for the school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution of local districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of public school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, for operation of the school lunch program.)

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

REVENUE RECEIPTS: Includes all revenue receipts available for expenditures for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad.)

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

# INDEX TO TABLES

*Numbers refer to tables.*

Administrative units:
  number of, B-1
Average daily attendance:

# FOREWORD

*Rankings of the States*, in its twenty-seventh year, provides state and local Association planners with rank-ordered statistics on population, enrollment, faculty, state-local government operations, and school finance. These descriptive data for the fifty states and the District of Columbia enable assessments of demographic and fiscal developments affecting public education currently and over recent years. While this information makes it possible to determine the status of various state-local government activities pertinent to public education, caution is advised in drawing conclusions about the quality of education and other government services based solely on statewide averages presented in this report. State averages or summaries of locally-based public services hide as much as they reveal. Further, presentation of rank-ordered statistics necessarily implies similarities among states or other government units which may not be accurate. Please interpret states' relative positions accordingly.

*Rankings of the States, 1984* contains revised figures for some data previously published in *Estimates of School Statistics, 1983-84*, an annual report of NEA Research. State education agencies were invited to review their fall 1983 estimates and revise them for inclusion in this report. For this reason, tables in B, C, F, and H Series may differ from those in *Estimates of School Statistics*. Please refer to footnotes at the end of these Series for information about sources of estimated figures.

All state data are ranked beginning with the largest figure. When the values of two or more states are identical, the states are assigned the same rank, with the appropriate number resumed with the next state in rank.

Many of the following tables contain information from federal government sources. Every effort has been made to obtain current data. However, the availability and scheduling of reports from federal agencies necessitates usage of data from prior years in some instances.

Tables D-15 and D-16 contain data from the *Sales and Marketing Management Survey of Buying Power*, a copyrighted work. Reproduction of these tables is prohibited unless permission is obtained from Sales and Marketing Management, 633 Third Avenue, New York, New York, 10017.

This project was directed by Susan Carmon Gewirtz with assistance of other NEA Research staff members. Special acknowledgement is given to Susan M. Falsey for her direction of the project's computer operations. Thanks are extended to those state department of education personnel who conscientiously provided up-to-date public school statistics.

# POPULATION

The population tables in Series A are useful in assessing and predicting the demand for public education, based on changes and shifts in the total and school age population.

Tables A-1 through A-3 rank the total resident population in the United States, allowing comparisons among states and comparisons over time. These figures, along with tables A-10 and A-11 permit assessments of population growth and decline in a state, particularly when used in conjunction with prior editions of *Rankings of the States*.

Tables A-4 and A-5 focus directly on the current consumers of public elementary and secondary education—the 5 to 17 age group, or school age population. Changes in the size of this age group affect demand and support for public education in a state. For this reason, it is helpful to use tables A-4 and A-5 with tables in B Series that deal with public school enrollment.

Information about the adult population is featured in table A-9, with table A-7 showing the relationship of the adult population to the school age population, and tables A-8 and A-9 focusing on the percent of persons over 65 years of age. These tables help to identify the relative demand for school services in the states, and the degree to which funding for public schools will face competition from other public sector activities.

Table A-12 ranks the population per square mile of land area, indicating the relative population density in the states.

## ENROLLMENT, ATTENDANCE, AND MEMBERSHIP

Demand for public education services is measured in B Series through data presented on the participation of youths in K-12 and higher education systems.

Tables B-2 through B-5 contain enrollment counts in the fall of the school years featured, including the current enrollment in public schools, the change in enrollment from 1982 levels, and the proportion of the school age population (5-17) enrolled in public school systems. Table B-5 indicates the demand for private versus public education services.

Average Daily Attendance (ADA) and Average Daily Membership (ADM) are presented in Tables B-6 through B-9 as alternative measures of pupil participation over the course of the school year. These measures are defined in the glossary of this report.

The change in the number of high school graduates is featured in Table B-11, providing a barometer for future demand for higher education services. Enrollment in institutions of higher education for the 1982-83 academic year is displayed in Tables B-12, B-13, and B-14.

Footnotes to the B Series tables appear at the conclusion of the Series, noting the instances where NEA estimated data appear in lieu of state education agency statistics.

B-1. NUMBER OF BASIC ADMINISTRATIVE UNITS (OPERATING PUBLIC SCHOOL DISTRICTS), 1983-84

# NOTES TO B SERIES TABLES

NEA Research estimates for selected variables within the B Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | B-2 through B-4, B-6 through B-10 |
| Arizona | B-2 through B-4, B-6 through B-9, B-11 |
| Maryland | B-11 |
| Michigan | B-2 through B-4, B-6 through B-9, B-11 |
| Mississippi | B-2 through B-4, B-6 through B-9, B-11 |
| Nebraska | B-6 through B-9 |
| New Jersey | B-6 through B-9 |

1002

# FACULTY

The tables in C Series rank states by the levels of personnel in local public schools and in higher education institutions. Changes in the number and salaries of persons employed in elementary, secondary, and higher education are linked to population and enrollment trends, as well as changes in the financial condition of governments and school systems. Thus, it is useful to examine C Series tables along with tables in other series to better understand the differences among states in the number of personnel at work in the public education systems.

Tables C-1 through C-3 rank the states according to the number of staff employed in local public schools in 1982. Comparable data for public colleges and universities appear in tables C-4 through C-6.

Data from B Series tables are utilized in tables C-7 through C-9 to provide three measures of the pupil—teacher ratio based on enrollment, attendance, and membership statistics.

Teacher salary data for the last two school years are featured in tables C-11 through C-16, with table C-15 comparing the percent increases in average classroom teacher salaries over the period 1973-74 through 1983-84. Instructional staff salaries, which include those of teachers, are similarly compared in tables C-17 through C-22.

Compensation levels of higher education faculty appear in the final tables of C Series. Three categories of public higher education institutions are presented: salaries for faculty at all public higher education systems; public four-year institutions; and public two-year institutions.

Footnotes to C Series tables appear at the end of this section. These notes indicate instances where NEA estimated data appear in lieu of data from state education agencies.

## NOTES TO C SERIES TABLES

NEA Research estimates for selected variables within the C Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | C-7 through C-22 |
| Arizona | C-7 through C-9, C-11 through C-22 |
| California | C-7 through C-10, C-13 through C-22 |
| Colorado | C-7 through C-10 |
| District of Columbia | C-7 through C-10 |
| Kansas | C-10 |
| Maryland | C-10 |
| Massachusetts | C-10, C-17 through C-22 |
| Michigan | C-7 through C-10, C-13 through C-22 |
| Mississippi | C-7 through C-10 |
| Montana | C-7 through C-10 |
| Nebraska | C-7 through C-10, C-13 through C-16, C-19 through C-22 |
| Washington | C-10, C-13 through C-16 |

# GENERAL FINANCIAL RESOURCES

Personal income is a widely used measure of the overall economic activity of states. It is defined as the aggregate or total income from *all* sources received by persons residing in a state, and has a significant effect on the total income or financial resources available to governmental jurisdictions in a state to finance public education and other public services.

Tables D-1 and D-2 compare states on their total personal incomes as well as the percent increases in personal income. Per capita personal income tables are featured in tables D-3 through D-6. They display state personal income per resident, providing more detail about the relative financial well-being of individuals within a state.

Tables D-7 through D-10 present another measure of state income—disposable personal income. Disposable personal income is total personal income minus taxes paid and other nontax payments, such as fines, penalties, and fees paid to hospitals and schools operated mainly by governments. Disposable personal income thus reflects the amount of income left for various expenditures *after* taxes and other public service charges. Tables D-8 through D-10 rank states according to *per capita* disposable personal income, again providing a finer level of detail using population data.

Tables D-11 and D-12 compare the states on a measure of personal income geared more closely to the consumers of public education services—those persons in the school age population and pupils measured in average daily attendance. Table D-13 shows the extent of government input into state personal income by measuring personal income from all government enterprises. Income from farming activities is ranked among the states in table D-14, and tables D-15 and D-16 contain average household buying incomes and retail sales per household.

# NOTES TO D SERIES TABLES

NEA Research estimates for selected variables within the D Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

# GOVERNMENTAL REVENUE

The tables in E Series rank states based on the revenue collections of state and local governments. These data are important in that they show the amounts of funds raised through taxation and fees to be made available to public schools and other public service programs. Tables E-1 through E-12 provide a variety of measures to indicate the taxing effort and general revenue condition of state-local government jurisdictions. Some of these tables are expressed in collections per resident and collections as a percent of personal income in the state, permitting more meaningful comparisons of the taxing actions of governments with whom public schools are financially tied.

E Series tables display revenue data for three major classifications: general revenues, tax collections, and property tax collections. These data are shown by state, with state-local amounts combined and sometimes separated so local data are distinct. E Series tables are informative when used in conjunction with tables in F Series (school revenues) and G Series (government expenditures).

# SCHOOL REVENUE

F Series tables update public school revenue estimates provided to NEA Research by state education agencies. The data first appear in *Estimates of School Statistics*, an annual publication of NEA Research done each Fall. The state education departments are invited to revise these financial data in April for inclusion in *Rankings of the States.*

The tables that follow examine the states' relative positions with regard to school revenues per pupil in Average Daily Attendance (ADA), and as a percent of state personal income. These measures make it easier to compare the "effort" of governments to provide financial support for elementary and secondary education by measuring that support through the use of a common denominator (pupils, personal income, etc.).

Tables F-5 through F-10 identify the percent of total revenues provided to local schools by the three principal government sources: federal, state, and local. F-11 identifies the local portion of school revenue receipts from combined state and local sources.

NEA estimates are used in F Series when state education agency data were not provided. Please note these exceptions in the footnote section following the F Series tables.

F-1. PUBLIC SCHOOL REVENUE PER PUPIL IN AVERAGE DAILY ATTENDANCE, 1982-83 (REVISED)

# NOTES TO F SERIES TABLES

NEA Research estimates for selected variables within the F Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

# GOVERNMENT EXPENDITURES

Expenditures of state and local governments provide a profile of government activity, indicating differences among states in spending for various public services, including public education. Expenditure levels for government programs differ from state to state because of population composition and density, geography, cost of living, scope of government services, legislatively perceived priorities, and other factors. Comparisons among states should take these circumstances into account.

The ten tables in G Series describe three separate areas of governmental expenditures: state government spending, combined state—local government expenditures, and state and local debt. Per capita expenditures allow closer comparison of the differences in the levels and objects of state and local government spending and their position relative to the U.S. average.

Table G-1 ranks the states on state spending for all functions, showing the scope of the state's financial role. When compared with the combined state and local outlays in table G-2, the relative state and local positions of financial responsibility may be determined.

Tables G-3 through G-9 contain expenditure amounts for several selected government functions. These are subsets of the totals in table G-2.

# SCHOOL EXPENDITURES

Tables contained in H Series feature comparative expenditure data on education for state governments, local governments, and state-local governments combined. These education expenditures are shown in relation to several common denominators, such as per capita, percentage of personal income, per pupil in ADA or ADM, or the national average.

These tables further distinguish between all education expenditures, those for higher education, and public elementary and secondary education. Taken together, Series H tables reveal a great deal about each state's success or failure to gain financial support for education relative to other states. The rankings can have added meaning where a reader is able to draw on personal knowledge about the way education is organized and supported in each of several states.

Estimated data obtained from state departments of education appear throughout H Series. NEA Research estimates were used when state department data were not available. Please note these instances in the footnotes section immediately following the series.

# NOTES TO H SERIES TABLES

NEA Research estimates for selected variables within the H Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | H-11, H-12, H-14, H-16, H-17 |
| Arizona | H-11, H-12, H-14, H-16, H-17 |
| Michigan | H-11, H-12, H-14, H-16, H-17 |
| Mississippi | H-11, H-12, H-14, H-16, H-17 |
| Montana | H-9 through H-17 |
| Nebraska | H-11, H-12, H-14, H-16, H-17 |
| New Jersey | H-9 through H-17 |
| Wyoming | H-11, H-12, H-14, H-16, H-17 |

1045

# OTHER RELEVANT DATA

The tables within the I Series contain additional comparative characteristics on government employment and on measures often used to describe the "quality of life" in an area.

The government employment measures featured in tables I-1 through I-3 are expressed as percentages of the population or other employment categories and can be used with employment tables found in C Series.

Tables I-4 and I-5 measure the presence or absence of doctors and dentists in the states, with I-6 and I-7 comparing states on crime rates.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

BASIC ADMINISTRATIVE UNIT: The local school district; the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny ($50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education; employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds to cover deficits (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

EDUCATION: The provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year. New entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October.

FIRE PROTECTION: Comprises fire-fighting and fire-protection activities of local governments.

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditures for each function includes amounts for all types of expenditures serving the purpose concerned.

GENERAL EXPENDITURE: All expenditures of a government other than utility expenditures, liquor store expenditures, and insurance trust expenditures.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

1051

GOVERNMENT EMPLOYEES: All persons who work for any governmental unit (federal, state, local, or intermediate) regardless of the activity of the particular agency.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agency) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classified under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditures for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt.

LIVE BIRTHS: Number of births in the U.S.

NET LONG-TERM DEBT: Total long-term debt outstanding minus offsets to long-term debt, which comprise financial assets of sinking funds and other reserve funds, however designated, that are specifically held for retirement of long-term debt. Full faith and credit includes all long-term credit obligations of the government and its agencies backed by full faith and credit (implying the power of taxation).

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all tangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC WELFARE: Support of and assistance to eligible persons contingent upon their need. Excludes

pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditures for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of an area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution of local school districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, operation of the school lunch program).

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

TOTAL REVENUE RECEIPTS: Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

# FOREWORD

Throughout 1985, the processes, outcomes, and resources available to public education continued to enjoy unprecedented levels of attention. The public has maintained its interest in and demands for educational excellence. With sustained intensity, state legislatures have focused on education funding and teacher compensation systems.

The NEA continues its active participation in and support of these efforts, and offers *Rankings of the States, 1985* as one resource available to NEA's state and local affiliates, to government officials, and to interested citizens as they address various aspects of education reform.

*Rankings of the States, 1985* provides current statistical information about public education and related topics, such as state-local government operations, population, and school finance. The tables which follow contain descriptive data for the fifty states and the District of Columbia, enabling assessments of demographic and fiscal developments affecting public education currently and over time. While it is inevitable that rank-ordered tables encourage state-by-state comparisons, these state-level data conceal critical local variations, and as such, prohibit conclusive judgments about the quality of public education within states. For this reason, data contained in *Rankings of the States* are useful only to the extent that they can be supplemented with other, more specific information about public education systems.

This project was directed by Susan Carmon Gewirtz of NEA Research, with assistance of other NEA Research staff members. Susan M. Falsey was responsible for the project's computer operations and technical support.

NEA Research extends its appreciation to those state department of education personnel who provided current public school statistics for inclusion in this report.

# TECHNICAL NOTES

*Rankings of the States, 1985* contains rank-ordered statistics for the fifty states and the District of Columbia. All state data are ranked beginning with the largest figure. When the values of two or more states are the same, they are assigned the same rank, with the appropriate number resumed with the next state in rank.

Please note that *Rankings of the States, 1985* features revised figures for some estimated data previously published in *Estimates of School Statistics, 1984-85,* another report of NEA Research published in March 1985. State education agencies were invited to review their fall 1984 estimates and revise them for inclusion in this report. For this reason, estimated data in B, C, F, and H Series may differ from those in *Estimates of School Statistics.*

This edition of *Rankings of the States* includes tables presented for the first time, and also reflects the discontinuation of selected tables. Tables previously featured in the I Series have been discontinued, for example. Every effort has been made to obtain current information, but the availability of data from federal government and other sources dictates the presence or absence of certain tables in this report.

Tables D-15 and D-16 contain data from the *Sales and Marketing Management Survey of Buying Power*, a copyrighted work. Reproduction of these tables is prohibited unless permission is obtained directly from Sales and Marketing Management, 633 Third Avenue, New York, New York, 10017.

# POPULATION

Tables in A Series provide information about the population of states, and can serve as indicators of demand for public education services.

The level and change in the total population of states shown in Tables A-1 through A-4 help to identify patterns of growth or decline for each state. Used in conjunction with A-11 and A-12, assumptions can be made about the relative stability of a state's population, and the implications for state personal income and revenue bases, for example.

School-age population data in Tables A-5 and A-6 focus directly on the consumers of public elementary and secondary education. Combining these figures with public school enrollment tables in B Series can indicate demand for and participation in public school services.

Tables A-7 through A-10 define the adult population within states. Changes in the size of adult and elderly age groups affect demand for public school programs and the degree to which funding for education faces competition from other public sector programs. These tables also can indicate the willingness of citizens within a state to support public education.

## ENROLLMENT, ATTENDANCE, AND MEMBERSHIP

Tables in the B Series feature enrollment counts for public elementary and secondary schools and for institutions of higher education. The tables include current data on persons enrolled, and the change in enrollment over the previous year and over a decade. B Series tables enable assessments of which states can expect to experience the greatest demand for public school services and staff.

Alternative measures of public school participation are included in this Series. Average Daily Attendance (ADA) and Average Daily Membership (ADM) are presented in Tables B-5 through B-8, and differ from fall enrollment counts in that they present a picture of pupil participation *year round*. Departments of education in five states do not calculate ADM, however, and are identified as "NA" in Tables B-6 and B-7, and throughout other Series as appropriate.

Table B-10 shows the 5-year change in the number of high school graduates, useful in gauging demand for higher education services in the future, while current enrollment trends in higher education institutions are presented in Tables B-11 through B-13.

Footnotes to the B Series tables note the instances where the NEA has made estimates of public school statistics, in lieu of state education agency estimates.

## NOTES TO B SERIES TABLES

NEA Research estimates for selected variables within the B Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | B-2 through B-8, B-10 |
| Massachusetts | B-2 through B-8 |
| Michigan | B-2 through B-8, B-10 |
| Montana | B-10 |

1072

# FACULTY

Personnel in local public schools and in public institutions of higher education are the focus of tables in the C Series. Changes in the number of staff employed in education institutions as well as their levels of compensation reflect trends in 1) enrollment; and 2) in the financial condition of state-local governments and school systems. Shifts in levels of staffing and compensation can, in turn, affect the financial condition of government units.

The number of instructional staff in public schools and public institutions of higher education are featured in Tables C-1 through C-4, while various measures of pupil load follow in Tables C-5, C-6, and C-7.

Average salaries of public classroom teachers and total instructional staff are featured in C-9 through C-22. For the first time, tables in C Series feature salary trends for public school staff expressed in *constant-dollar* terms (Tables C-14 and C-21). To indicate "real" or inflation-free changes in salaries paid professional staff, percentage increases *without* the effects of inflation are presented for the period 1974-75 to 1984-85. The Consumer Price Index for all Urban Consumers, (CPI-U) converted to a school-year basis, with 1974-75 as the base year, was used in these computations.

Footnotes to C Series tables appear at the end of this section. These notes identify instances where NEA-estimated data appear in lieu of estimates from state education agencies.

## NOTES TO C SERIES TABLES

NEA Research estimates for selected variables within the C Series are identified below by state and by table number. NEA estimates appear in those cases where state education departments did not respond to requests by NEA Research for estimates of school statistics.

| | |
|---|---|
| Alaska | C-1, C-5 through C-22 |
| Arizona | C-9 through C-22 |
| District of Columbia | C-11 through C-15, C-18 through C-22 |
| Massachusetts | C-1, C-5 through C-8,C-11 through C-15, C-18 through C-22 |
| Michigan | C-9 through C-22 |
| Montana | C-11 through C-15, C-18 through C-22 |
| Nebraska | C-18 through C-22 |
| Nevada | C-1, C-5 through C-8 |

# GENERAL FINANCIAL RESOURCES

Personal income is a widely-used measure of the overall economic activity of states. It is defined as the aggregate or total income from *all* sources received by persons residing in a state, and has a significant effect on the total income or financial resources available to governmental jurisdictions for the financing of public education and other services through taxation.

Tables D-1 and D-2 compare states on their total personal income and percentage change in this measure. Per capita personal income is featured in Tables D-3 through D-6, providing more detail about the relative financial well-being of individuals within a state, and adding to the comparability of the personal income data.

Disposable personal income represents the personal income of residents *minus* taxes and other nontax payments, such as fines, penalties, and fees. Disposable personal income thus reflects the amount of income remaining for expenditure on consumer goods, for example. Tables D-8 through D-10 show *per capita* disposable personal income, rendering the state-level data more comparable.

Tables D-11 and D-12 compare the states on a measure of personal income geared more closely to the consumers of public education services—those persons in the school age population, and pupils measured in average daily attendance. Table D-13 shows the relative level of government input into state personal income by measuring personal income from all government enterprises. Income from farming activities is ranked among the states in Table D-14, and Tables D-15 and D-16 contain average household buying incomes and retail sales per household, measures similar to disposable personal income.

# GOVERNMENTAL REVENUE

The extent to which government jurisdictions (more specifically, their residents) impose taxes has a significant effect on the financing of public schools and the compensation of school personnel. Revenue of state and local governments, principally tax revenue, is highlighted in the E Series.

General revenue, own-source revenue, and tax collections are presented for states, local governments, or state and local governments combined. Revenue data are expressed on a per resident basis, or as a proportion of state personal income. The latter expression, found in Tables E-3, E-5, E-9, E-12, E-15, and E-16, demonstrates that for every $1,000 of personal income in a state, a certain amount of revenue (general, tax) is raised. This is often referred to as the "effort" of that government unit to generate funds, such as property tax or income tax collections.

New to the E Series are tables containing state revenue from general sales and from individual income taxes. Tables E-13 through E-16 list these collections per resident, and per $1,000 of state personal income. Please note that in Tables E-13 and E-15, extremely low amounts listed for several states indicate that the state income tax on individuals is severely restricted, such as in Alaska and New Hampshire. Please consult *State Tax Collections* for details on state tax characteristics.

# SCHOOL REVENUE

The tables in F Series complement those in the preceding section by supplying data on public school revenues. Funds received by public school districts from federal, state, and local sources are listed for each state, and are expressed in relation to the number of pupils, state personal income, and according to the percentage distribution among revenue sources.

The tables that follow examine the states' relative positions with regard to school revenues per $1,000 of state personal income (F-3, F-4). These measures, as with the examples in the E Series, make it easier to compare the "effort" of government units to provide financial support for public school programs by measuring that support with the use of a common denominator (personal income).

Please note that the school revenue data contained in F Series tables are more current than those published in *Estimates of School Statistics, 1984-85.* State education departments may choose to revise their estimated data for inclusion in the *Rankings* report.

Estimates generated by NEA Research appear in the F Series when state education agency estimates were not provided. Please note these exceptions in the footnote section following the F Series tables.

# GOVERNMENT EXPENDITURES

Expenditures of state and local governments provide a profile of government activity, indicating differences among states in spending for various public services. Expenditure levels for government programs differ from state to state because of population composition and density, geography, cost of living, scope of government services, legislative priorities, and other factors. Comparisons among states should take these circumstances into account.

G Series tables describe governmental expenditures in three basic categories: state government spending, combined state-local government expenditures, and state and local debt. Per capita expenditures allow closer comparison of the differences in the levels and objects of state and local government spending and their position relative to the U.S. average.

Total general spending by state and local governments is featured, expressed on a per capita basis and per $1,000 of state personal income. Per capita expenditures for selected government functions follow. These are provided as indicators of the relative priority, need, etc. accorded public programs in each state, and they also serve as bases for comparing state-local government spending for public education programs. Data pertaining to spending for local public schools and for higher education can be found in the H Series.

# SCHOOL EXPENDITURES

Education expenditures are the subject of tables in H Series. Selected measures of school spending contained in this section often are used to evaluate state-local government actions designed to improve the quality of public education. Current expenditures per pupil in Average Daily Attendance (ADA) or Average Daily Membership (ADM) are but two common measurements of education support. School expenditure data are displayed in relation to several other common denominators, such as a per capita basis, a proportion of state personal income, a percentage of total expenditures for all functions, or a percentage of the national average.

These tables further distinguish among expenditures for all public education, both elementary-secondary and higher education combined, and those for higher education or K-12 programs alone. Taken together, Series H tables help to highlight differences among states in terms of their success or failure to gain financial support for education, relative to other states. Again, knowledge about public education structures and financial support is required in order to make fair assessments of state-local governments' "effort" to finance public school programs.

Estimated data obtained from state departments of education appear throughout the H Series. NEA Research estimates were used when state department data were not provided. Please note these instances in the footnotes section immediately following the series.

# GLOSSARY

AVERAGE DAILY ATTENDANCE: Average of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average of the pupils belonging, those present plus those absent, when schools are actually in session.

BASIC ADMINISTRATIVE UNIT: The local school district; the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; initial, additional, and replacement of equipment.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and local—for public elementary and secondary day schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the cost of operating the state department of education and the intermediate (county) departments of education; employers' (state, intermediate, and local) contributions to retirement systems and/or social security on behalf of public school employees; and federal, state, and local funds to cover deficits (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

EDUCATION: The provision or support of schools and other education facilities and services.

EFFECTIVE BUYING INCOME: Same as disposable personal income; is obtained by deducting from personal income direct personal taxes and certain other nontax payments to government. The personal taxes deducted include federal, state, and local income taxes, estate and gift taxes, and miscellaneous licenses and permits. Property taxes are not deducted.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year. New entrants are added, but those leaving are not subtracted.

ENROLLMENT IN HIGHER EDUCATION: Includes students whose programs of study are creditable toward a bachelor's or higher degree and also students in 1-, 2-, or 3-year undergraduate programs that are not creditable toward a bachelor's or higher degree but that are designed to prepare for immediate employment or to provide general education.

EXPENDITURES: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures includes only external transactions of a government and excludes noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October.

FIRE PROTECTION: Comprises fire-fighting and fire-protection activities of local governments.

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditures for each function includes amounts for all types of expenditures serving the purpose concerned.

GENERAL EXPENDITURE: All expenditures of a government other than utility expenditures, liquor store expenditures, and insurance trust expenditures.

GENERAL REVENUE: All revenue of a government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GENERAL SALES TAXES: Sales or gross receipts taxes which are applicable, with only specified exceptions, to all types of goods and services, or all gross income, whether at a single or at classified rates.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agency) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except that agricultural experiment stations and agricultural extension services are classified under natural resources, and university-operated hospitals serving the public are classed under hospitals. These education categories include related services such as pupil transportation, school milk and lunch programs, cafeterias, health and recreational programs, and the like. Revenue and expenditures for school lunch services, dormitories, athletic events, and other auxiliary services are included on a gross basis.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

HOUSEHOLD: A unit that includes all persons occupying a house, apartment, or room regarded as a dwelling unit, excluding group quarters such as dormitories.

INDIVIDUAL INCOME TAX: Taxes on individuals measured by net income, and taxes imposed on special types of income (e.g., interest, dividends, and income from intangibles).

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt.

LIVE BIRTHS: Number of births in the U.S.

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes nonmonetary income or income received in kind. The figures include income of individuals and also income of nonprofit institutions; private trust funds; and private pension, health, and welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all tangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC WELFARE: Support of and assistance to eligible persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditures for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of an area, the figure also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or social security on behalf of public school employees, for the purchase of materials for distribution of local school districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or social security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, for example, operation of the school lunch program).

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

SCHOOL-AGE POPULATION: Population age 5 through 17, inclusive (excluding armed forces abroad).

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

TOTAL REVENUE RECEIPTS: Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.
